

# LUCIA

Welcome to the LUCIA  
Knowledge Centre!

# WHY?

The LUCIA Knowledge Centre (KC) aims to:

- make the best use of the **existing knowledge** on urban lighting,
- and encourage: **Learning + Sharing = peer-to-peer exchanges** within the Baltic Sea region.

# WHY?

We are now opening the Knowledge Center to relevant and interested stakeholders across the Baltic Sea Region:

This is your opportunity to join a platform powered by ideas, inspirations and knowledge on the issues of urban lighting!

# WHAT?

The LUCIA KC is plugged into the **LUCI Hub** online knowledge-sharing platform for urban lighting professionals. It is:

- a resource centre on urban lighting,
- a collaborati

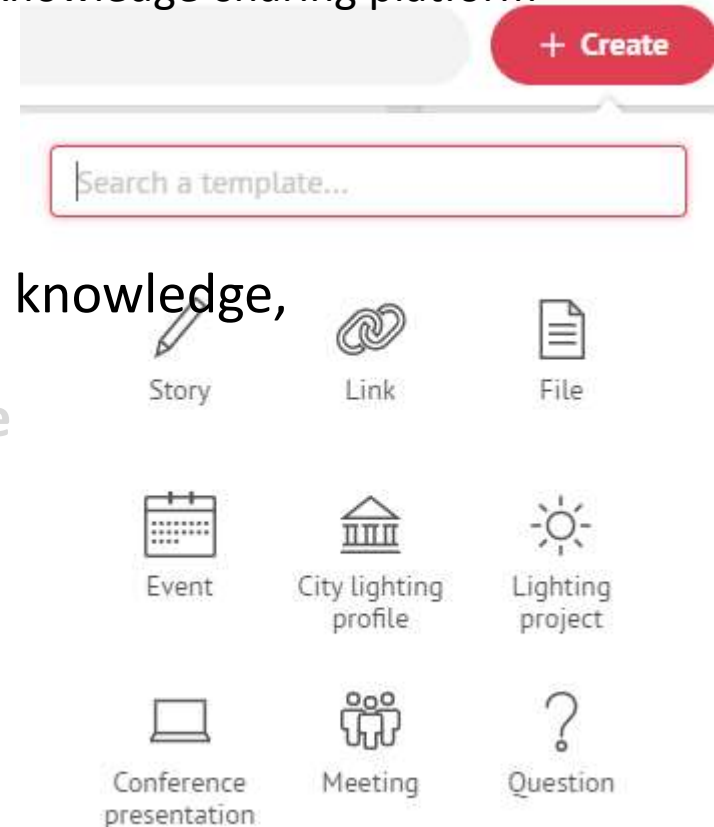

The screenshot shows the LUCI Hub interface. On the left, there is a grid of 12 project cards, each with a thumbnail image and a title. One card, titled 'Artistic escapes at twilight, lighting masterplan, Valenciennes, France - Winner...', is expanded to show a larger view on the right. This expanded view includes a title, a description, a list of tags (architecture, beautification, heritage, +5), and a 'Lighting Profile' button. Below the main grid, there are several more cards, including one titled 'Durham Castle and Cathedral lighting project (UK)' and another 'Dynamic lighting with presence detectors - Toulouse (France)'. The interface also shows navigation elements like 'City Lighting Profile' and 'inspired in L. Lighting library'.

This screenshot shows the 'Albertslund Lighting Profile (Denmark)' page. At the top, it says 'City Lighting Profile' and 'inspired in L. Lighting library'. Below this is a large image of a street at night with streetlights and a sign that says 'LUCIA'. The title is 'Albertslund Lighting Profile (Denmark)'. Below the title, there is a list of links: 'Additional information', 'Logo of the city', 'City Website', 'Other useful links', 'Danish Outdoor Lighting Lab', 'City of Albertslund signs LUCI Charter', 'A glimpse of the city Content created with the support of the EU INTERREG BSR Lucia project'. At the bottom, there is a section titled 'The Value of Smart Urban Lighting (TU/e)' with a thumbnail image of a smart lighting device and a brief description: 'TU/e recently published a report in which smart lighting is defined, the value of smart lighting is explored for both energy and operational costs for municipalities as well as added value for citizens' well-being by describing different use cases...'. There are also tags for 'energy efficiency', 'sensors & detection', and 'case study'.
